

DIVISION 141-089
DEPARTMENT OF STATE LANDS

NEED FOR THE RULE(S):

The need for these proposed rule changes is fourfold: 1) update general and activity-specific conditions of General Authorizations to ensure protection of the functions and values of waters of this state; 2) include additional qualifying activities that have no more than minimal adverse effect to waters of this state; 3) remove two General Authorization types that are either no longer being used and/or are duplicative of other regulatory tools for their authorization; and, 4) generally improve consistency, readability, and organization of the rule language.
