

WQPMT Meeting Agenda
January 30, 2020 10:00 am – 2:45 pm
Oregon Department of Agriculture
635 Capitol St NE
Salem, Oregon
3rd Fl Conference Room

10:00 Introductions and Agency Updates (5 minutes per Agency)

- a) Waste Collection Events (Issues)
- b) Notable Monitoring Findings
- c) Update of PSP data viewer
- d) Approval of November Minutes
- e) Other

10:45 South Umpqua Pilot Project (Decision Discussion)

A discussion was held with the SAG regarding the fate of the South Umpqua Pilot Study. Based on the results of that discussion, it appears that a majority of the SAG members recommend that the pilot study be concluded and a final report/fact sheet be developed. The WQPMT will discuss the SAG's recommendation and make a final decision regarding the project and also provide guidance as to what form a final document would take.

11:30 Direction for PSP Program and Individual Watershed Projects (2019-2021 Biennium)

Several PSP actions were discussed during the SAG meeting. This include:

- a) modifications of monitoring schedule for several PSP areas
- b) pros and cons of expansion of PSP areas/study areas
- c) Middle Deschutes (New 303(d) Listings for Chlorpyrifos

The WQPMT will discuss these items in order to develop agreement and clarity moving forward through the current biennium.

12:15 Lunch Break

1:00 Development of Statewide Strategic Plan for Pesticide Stewardship Partnership

The concept of developing a Strategic Plan for the PSP program has been a focus for the SAG for the last two meetings. While this has been a focus for the SAG it has not been discussed at any great length within the WQPMT. During this session, the format and scope of the Strategic Plan will be discussed. Included in this discussion will be how the

Program Strategic Plan should interface with the PSP area specific Strategic Plans currently being developed.

1:45 OSU Education and Outreach Project. What is Does and Doesn't Do.

The OSU Education and Outreach Project has been signed by OSU and is awaiting signature by ODA management. The WQPMT will discuss this project and any advice and/or assistance the team will be willing to provide OSU during the development of the deliverables. There are three aspects to this project and delivery of products. Development of general water quality/pesticide Education and Outreach are the prime goals of the project. Engagement and customized delivery of these messages to each local PSP is the other. The latter aspect will require a fair amount of WQPMT engagement with both OSU and our local stakeholders. The Team should be prepared to discuss how we will approach this aspect in order to achieve both statewide and local goals.

2:45 Schedule next meeting and potential topics/guests

a) Karl Morgenstern (hazelnut project)
