

Oregon Sno-Parks

**DRIVER AND MOTOR VEHICLE SERVICES
OREGON DEPARTMENT OF TRANSPORTATION**

SNO-PARK PERMITS

Do you like to play in the snow, ski, snowshoe, snowboard, or snowmobile? Oregon's Sno-Park Program helps provide parking at many winter recreation areas.

You must have a valid Sno-Park permit displayed near the lower left corner of the windshield of your vehicle if you park in a designated winter recreation parking area (Sno-Park) **beginning November 1 and ending April 30**. Each of these areas is posted with signs identifying it as a Sno-Park. You will find Sno-Parks in Oregon's mountain passes and at most recognized ski, snowmobile, and snow play areas.

Oregon's Sno-Park Program is funded entirely by the sale of Sno-Park permits. The program provides funds for snow removal in Sno-Parks and enforcement of the permit requirement. Any money remaining may be used for maintenance and development of Sno-Parks or carried over for use in a following year.

There are three types of permits: an annual permit which costs \$25, a 3-day permit which costs \$9, and a 1-day permit which costs \$4. Daily, 3-day, and annual permits are sold in DMV field offices and by permit sales agents at various locations like winter resorts, sporting goods stores and other retail outlets. Sales agents may charge an additional service fee for each permit they sell. Annual permits are sold online at ***DMV2U.Oregon.gov***. If you buy an annual permit online, a printable interim permit will be emailed to you. You can use this interim permit for up to 14 days, until you receive the permanent annual permit in the mail.

The cost of the annual permit provides a discount to frequent Sno-Park users over the three day and daily permits. A survey of Sno-Park users indicated that most annual permits are used more than 13 times per winter.

Sno-Park permits issued by California and Idaho are honored in Oregon, and Oregon permits (except interim annual permits) are honored in those states. Parking in an Oregon Sno-Park without a permit may result in a \$30 fine.

CHAIN AND TRACTION TIRE REQUIREMENTS

When you travel in winter conditions you must carry chains or traction tires in or on your vehicle, and must use them, when required by the signs posted. Under some conditions, four-wheel and all-wheel drive vehicles may be exempt from the requirements to use chains.

“**Chains**” include link chains, cable chains, or any other device that attaches to the wheel, vehicle or outside of the tire that is specifically designed to increase traction on ice and snow.

“**Traction Tires**” are studded tires, retractable studded tires, or other tires that meet the tire industry definition as suitable for use in severe snow conditions.

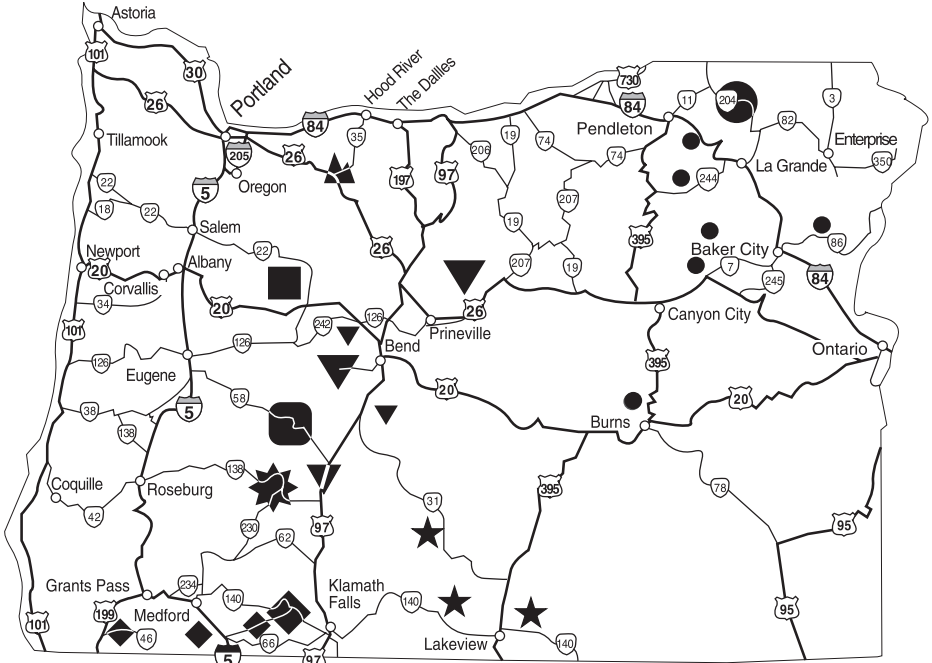

- Tires designated by the tire industry display an emblem on the tire sidewall like this:
- “**Retractable Studded Tires**” are tires with embedded studs that retract to at or below the wear bar of the tire and project not less than .04 inch beyond the tread surface of the tire when extended.
- “**Studded Tires**” are tires with studs that wear at the same rate as the tire tread and extend at least .04 inch but not more than .06 inch beyond the tread surface of the tire. Studded tires are only legal in Oregon from November 1 through March 31.

Drivers who don't follow the signs requiring chains or traction tires to be carried are subject to a Class C traffic violation. Not using chains or traction tires when signs require them could result in a specific fine traffic violation with an \$880 fine.

For more information on Oregon's chain and traction tire requirements, go to ODOT's travel web page at www.tripcheck.com

OREGON SNO-PARKS

Most of Oregon's Sno-Parks are on U.S. Forest Service land. Oregon Sno-Park Land Managers provided the information on activities available at or near each Sno-Park for this brochure. For questions on the activities available or to obtain trail maps please contact the appropriate land manager. A list of Sno-Park land managers is included on page 16.
