

View of load from the rear, when loaded and ready for transport. Height measured from flat ground.

Diagram not to scale.

The diagram shows a rear view of a trailer with a load. A vertical dashed line indicates the centerline. Five horizontal double-headed arrows, each labeled 'Width', indicate the load's width at different heights. On the right side, five boxes are connected to these measurement points by lines. Below the trailer, three checkboxes are provided for load placement relative to the centerline.

Width of load at 16 feet 0 inches height (if applicable)	
Width of load at 14 feet 0 inches height	
Width of load at 8 feet 6 inches height	
Width of load at 3 feet 6 inches height	
Width of load at trailer deck height	

<input type="checkbox"/> Load is centered on trailer.
<input type="checkbox"/> Load is offset to the right. How much?
<input type="checkbox"/> Load is offset to the left. How much?
