

Sidewalk Curb Ramps – U.S. 30 Bypass (Lombard/Sandy)

Project Details

We are bringing 300 sidewalk curb ramps up to the current Americans with Disabilities Act (ADA) accessibility standards along an eight-mile stretch of U.S. 30 Bypass (North Lombard Street, Northeast Killingsworth Street and Northeast Sandy Boulevard) in Portland at unsignalized intersections. The corners being upgraded along U.S. 30 Bypass are between North Syracuse Street and Northeast 165th Avenue. Everyone who uses sidewalks along the highway will benefit from these upgrades. Construction begins this month and will continue through March 2025. Generally, it takes one to two weeks to complete work on an individual corner, with construction on several corners happening at the same time. However, only one corner per intersection will be impacted at a time.

Visit the project website at www.R1ADA.org or scan the QR code for construction updates and to watch our ADA program in action.

Traffic Impacts

This work will cause temporary lane, shoulder and sidewalk closures on U.S. 30 Bypass and on intersecting local streets. We will provide ADA-accessible pedestrian and bicycle detours around the work zones and maintain access for customers of adjacent businesses. We will also coordinate with affected property and business owners.

Work Zone

Work is expected to take place during the day unless a temporary lane closure on U.S. 30 Bypass is needed, which could require night work. For any noise-related concerns associated with any nighttime work, contact the 24/7 noise hotline at 503-276-7810.

Improving access for those walking, rolling and riding in Oregon

The **ODOT ADA PROGRAM** is working to bring more than 25,000 curb ramps throughout Oregon into compliance with Americans with Disabilities Act (ADA) standards. We are committed to new standards for accessible routes through work zones, outreach and addressing public concerns. Everyone who uses sidewalks along our highways will benefit from this commitment and the improvements we make to the curb ramps.

Visit www.tripcheck.com or call 5-1-1 for current traffic conditions.
