<sup>1</sup>Pregnancies include resident births and occurrence abortions, but exclude fetal deaths and spontaneous abortions.

<sup>2</sup>Oregon residence figures for births (includes 15-44 year old females only).

<sup>3</sup>Oregon occurrence figures for abortions (includes 15-44 and unknown age females).

All rates per 1,000 population of 15-44 year old females. 1998: 701,660.

Note: ORS 435.496 was implemented in 1984 requiring all providers of abortions to file a report of induced termination of pregnancy for each abortion performed.

**TABLE 3-2.  
Live Births and Induced Abortions  
Occurring in Oregon, 1968-1998**

| Year | Births | Induced Abortions |       |
|------|--------|-------------------|-------|
|      |        | Number            | Ratio |
| 1968 | 32,675 | 323               | 9.9   |

\* The increase in the 1980 figure reflects improved reporting rather than an increase in the number of abortions performed. Approximately 1,000 - 1,400 of the abortions were performed by providers who did not participate in the voluntary abortion reporting system prior to 1980 even though they were performing abortions in previous years.

\*\* The increase in the 1984 figure is probably a consequence of the implementation of ORS 435.496, which requires that an induced termination of pregnancy report be filed by abortion providers whenever an induced abortion is performed.

Note: induced abortion ratio is the number of abortions per 1,000 live births.
