<sup>1</sup> All rates per 100,000 population.

<sup>2</sup> Most recent year for which final data are available.

<sup>3</sup> See footnote for this cause in table 6-6. Prior to 1999, alcohol-induced deaths included ICD-9 codes 291, 303, 305.0, 357.5, 425.5, 535.5, and 571.0-571.3.

<sup>4</sup> Beginning in 2006, the National Center for Health Statistics changed the ICD-10 codes for arteriosclerosis to include only ICD-10 code I70.

NOTE: Beginning in 1999, causes of death were classified using the rubrics and methodology of the tenth revision of the International Classification of Diseases (which supplanted the ninth revision). Final ICD-9/ICD-10 comparability ratios have been applied to all rates prior to 1999, except ALS and alcohol-induced deaths, where ratios were not calculated. See Appendix B.
