

**List of EPA Certified Wood Heaters
(Heaters certified as meeting the 2015 Standards of Performance for New Residential Wood Heaters)
October 2015**

EPA Wood Heater Program

Enclosed is the list of wood heaters certified by the United States Environmental Protection Agency (EPA) as meeting the 2015 Standards of Performance for New Residential Wood Heaters. The EPA Certified Wood Heaters list contains the manufacturer's name, model name, emission rate (g/hr), heat output (btu/hr), efficiency (actual measured), and appliance type for wood heaters approved by the EPA for sale in the United States. It also indicates whether the appliance is still being manufactured. An EPA certified wood heater has been independently tested by an accredited laboratory to determine if it meets the particulate emissions limit of 4.5 grams per hour for non-catalytic, catalytic, and pellet wood heaters. All EPA certified wood heaters that are offered or advertised for sale in the United States are subject to the 2015 New Source Performance Standard (NSPS) for New Residential Wood Heaters under the Clean Air Act and are required to meet these emission limits.

An EPA-certified wood heater can be identified by a readily visible permanent label, affixed to the wood heater, in a location where it can be easily viewed before and after the appliance is installed. If you have questions regarding a particular model line or manufacturer, please contact Rafael Sanchez via e-mail at sanchez.rafael@epa.gov.
