

Oregon Liquor & Cannabis Commission

Canopy Designations

A Producer may only have **20 designated canopy areas** (to include both immature, mature and propagation). These must be quadrilateral and be marked by a physical marker/boundary, or you may have a Professional Land Surveyor licensed by the Oregon State Board of Examiners for Engineering and Land Surveying provide a report stating that the total square footage of the designated canopies are within the applicable canopy size limits described in [OAR 845-025-2040](#).

Section 1 – Business Information

Licensee Name:	License Number:

Section 2 – Canopy Designation

Instructions: Using the table below, list your proposed canopy areas and identify them with a “canopy identifier”. Mark whether they are “Indoor”, “Outdoor”, “Immature” or “Propagation”. If you are applying for a Propagation Endorsement, your Propagation canopy will count in your 20 designated canopy areas and should be listed below in the table. Refer to the [Marijuana Maps Checklist](#) for guidance.

Canopies			Canopies
