

**New Safety Zone Rule (July 2014)  
Calculating a Safe Separation Distance (SSD)**

**SSD = 8 \* Slope wind Factor \* Height of the  
surrounding vegetation**

**SLOPE-WIND FACTOR**

Wind Speed	Flat 0% Slope	20% Slope	>30% Slope
Light 0-10 mph	1	2	3
Moderate 11-20 mph	2	3	5
Strong > 20 mph	3	5	6

**Safe  
Separation  
Distances**
