(Clackamas County) – The Oregon Watershed Enhancement Board (OWEB) selected The Freshwater Trust to receive a Salmon License Plate grant at their October 23-25 board meeting in Klamath Falls.

The Upper Sandy River Basin Habitat Restoration Project will increase the abundance and productivity of Sandy Basin salmon and steelhead populations by restoring access to habitat and accelerating the recovery of naturally-functioning conditions within the stream channels and floodplain areas of the Zigzag River. The OWEB grant award totals \$439,900.

Salmon License Plate revenues are generated from the extra fee Oregonians pay when they purchase Salmon Plates for their vehicles.

“Salmon License Plate dollars are a great way for Oregonians to be a part of improvements in salmon habitat,” says Lisa Charpillouz Hanson, OWEB’s executive director. “Healthy rivers for fish are also healthy rivers for communities.”

In addition to the Upper Sandy River Basin Habitat Restoration Project, the OWEB Board selected one other project to be awarded \$250,000 in Salmon License Plate funding:

- The Smith River Watershed Council was awarded a total of \$444,178 for the Smith River Basin: High Priority Passage Improvements Project. This project will correct fish passage impediments on three streams in the Smith River watershed to improve fish passage to upstream spawning and rearing habitat.

-more-

Salmon License Plate income totaled \$500,000 for the grant cycle, which was apportioned equally between the identified projects. The rest comes from a combination of Lottery and federal funding.

In total, the OWEB Board awarded 69 grants totaling \$12,461,865 to local organizations statewide to support fish and wildlife habitat and water quality projects using Lottery, Salmon License Plate, and federal Pacific Coastal Salmon Recovery funding provided by the National Ocean and Atmospheric Administration at their October meeting. A listing of all awarded grants is available at: <http://www.oregon.gov/OWEB/Documents/2023-Oct-Board-Awards.pdf>
