Subject: Proposed revisions to Division 205 rules concerning evidence of welding proficiency
Attachments: Proposed Language 690-205-0020(1)(e).pdf

Laura,

At our last Well Construction RAC meeting, the members of the RAC who are also OGWA members agreed to prepare and submit proposed revisions to the rules concerning evidence of welding proficiency in 690-205-0020(1)(e)(A), (B), (C), etc.

I have attached our suggestions for revisions to Sections (A), (B), and (C). We propose to strike the language which is currently in Section (A) and replace it with new language. We have also made some proposed changes to Sections (B) and (C). Please see the attached file for our proposed changes.

Regards,

Greg Kupillas, Chair
OGWA Government Affairs Committee

Oregon Ground Water Association, Government Affairs Committee

Proposed Revisions for 690-205-0020(1)(e) – Evidence of Welding Proficiency

- (A) Written documentation from a certified professional welder or welding instructor providing proof that the applicant has successfully completed arc welding tests to demonstrate proficiency at making full penetration welds that are water tight and equal to the full thickness of the material being welded.
- (B) A copy of a transcript from an accredited college, university, technical institute, or nationally recognized welding organization that demonstrates a passing grade in an arc welding training course.
- (C) A copy of a professional arc welding certification.
