Design Justice

Asks designers to use the process and outcomes of design to **dismantle the structures which use design to perpetuate racist and other oppressive systems.**

Emergent Strategy

Openness to new strategies, ideas, and ways of doing and being that emerge over time

Grow a compelling future together through relatively simple interactions

Enhancing Well-being

Centering the well-being of **people and place** at the intersection of the systems and flows in which they exist

Drawing **connections** between seemingly disparate activities

Essential to good governance

2022 foundational projects

		Justice, Equity, Diversity, Inclusion	Systems Thinking	Capacity, Relationships, Trust	Access, Decentralized	Iteration, Emergence	Well-being
	Listening sessions	Χ	X	Χ	X	X	X
RESEARCH	Map Oregon's building material resource flows and impacts	Χ	X	X	X	X	Χ
	Building code opportunities for material impact reduction	X	X	X	X	X	X
	Transparency disclosure incentive	Χ	X	Χ	X	X	X
	Pilot projects	X	Χ	X	X	X	X

listening sessions

"The essential first step requires the BE program to focus on deep listening and building relationships. It is critical to take the necessary time to build trust and cultivate a community of partners, particularly centering people and communities who are most burdened by the impacts of the built environment. This engagement must be focused on listening and learning – being influenced by more voices, learning what others are prioritizing and need, learning what others are already doing, identifying opportunities to support, and empowering the people and communities who are most impacted to have agency and decision-making power in their built environments."

listening sessions: overview

- Projected timeline: ongoing-early 2023
- Target audiences:
 - Impacted Communities
 - Government entities
 - Industry
- Currently evaluating proposals for a contractor focused on design and facilitation of the Impacted Community sessions

listening sessions: goals

- 1. Communication
 - Why DEQ is prioritizing the built environment
 - What guides the program's decision-making (Built Environment Strategic Plan, guidance, priority areas of work)
- 2. Listening and learning
 - Connect with Impacted Communities, governing bodies, and industry
 - Learn about the priorities and needs of these three audiences
 - Center the perspectives of Impacted Communities
- 3. Build relationships and trust, demonstrate accountability
 - Communicate how input will inform and guide the work of the program
 - Demonstrate accountability through multiple check-ins and creating an open dialogue
