Solid waste exported from Oregon - Fee Calculation

Name of Transporter

Please report amount of waste for appropriate reporting period by Oregon county. Attach separate sheet for additional counties. By-county accuracy for "In-State/Domestic" SW is important. However estimates may be used.

The following materials do not need to be reported separately by county, but are included in the total tonnage on which fees are paid unless they are approved and used as daily cover:

a) asbestos

- c) industrial process wastes
- b) contaminated cleanup material
- d) rubble, rock, and asphalt.

Domestic solid waste must be reported by county of origin.
